AEP Span Panel Featured on First Hotel in Portland's Historic Pearl District

West Sacramento, California – Wednesday, June 17, 2015 – AEP Span's Prestige Series® architectural metal panel is featured on the Residence Inn Marriott project, the first hotel in Portland's famous Pearl District.

Located in a revitalized area of the inner city that has earned a worldwide reputation for urban renaissance, the 223-room hotel is LEED Silver Certified. AEP Span's product not only contributed to the recycled content points, but from a design standpoint offering a broad color choice was essential.

"We used metal in two ways," stated Gary Golla, Associate, LEED AP, of Sera Architects of Portland, Oregon. "In metal, you can get very bright colors, which was important from a design [standpoint]. Portland can be a gray city in the winter. A range of color options was helpful, and subtle vertical panels with brown colors were used to interpret wood."

AEP Span provided 22ga Prestige Series 12" panels with no reveal in Dark Bronze, Weathered Copper, Regal White, and custom Autumn Gold and Royal Gold. Prestige Series is a concealed fastener metal wall system which provides a clean and distinct design and is available in four reveals. Moreover, Prestige Series is listed within an IAPMO-ES Evaluation Report, ER-0309, certifying its compliance to the 2012 International Building Code (IBC). AEP Span also supplied flat sheets in a custom Cotton White for fabrication by Metposite LLC., Hubbard, Oregon.

Building/facility Owner: Marriott International, Inc., Bethesda, Maryland

Architecture Firm: Sera Architects, Portland Oregon

General Contractor: Howard S. Wright, Portland, Oregon

Subcontractor: General Sheet Metal, Clackamas, Oregon

Manufacturer: AEP Span, Tacoma, Washington

ASC Profiles LLC is a subsidiary of BlueScope Steel and Nippon Steel & Sumitomo Metals Corporation. **ASC Profiles** is an industry leading manufacturer of cold-formed steel building components since 1971. **ASC Profiles** consists of three distinct business divisions, each serving a different market segment within the industry. **ASC Steel Deck** delivers a high quality line of structural roof and floor deck that has been fully tested for the commercial construction market. **AEP Span** provides architecturally engineered panels for steel roof and siding products for the commercial and industrial markets. **ASC Building Products** offers high quality steel roof and wall panels for the residential, light commercial, and agricultural markets.
