Installer: Cary & Associates Builders, Inc., Sebastopol, CA

General Contractor: Wright Contracting Company, Santa Rosa, CA

Architect: Gould Evans, San Francisco, CA

Manufacturer of Architectural Metal Panels: AEP Span, Tacoma, WA

A classic look with clean simple lines was the vision for MacRostie Winery and Vineyards' roof application. AEP Span's 24 gauge Span-Lok in Metallic Silver not only met the design needs, but was ideal for the future installation of solar panels. The project also features 24 gauge Box Rib in Metallic Champagne for the wall application and 24 gauge Prestige Series in Metallic Silver for the soffit application. By design, the MacRostie Estate incorporated interior and exterior seating areas with sweeping vineyard views, which captures the rustic grandeur of the Russian River Valley.
